

2020-2021 City Model Slideshow

School/Organization: **Eisenhower Science Technology Leadership Academy**

Educator Name: **Cyndie McGeehan**

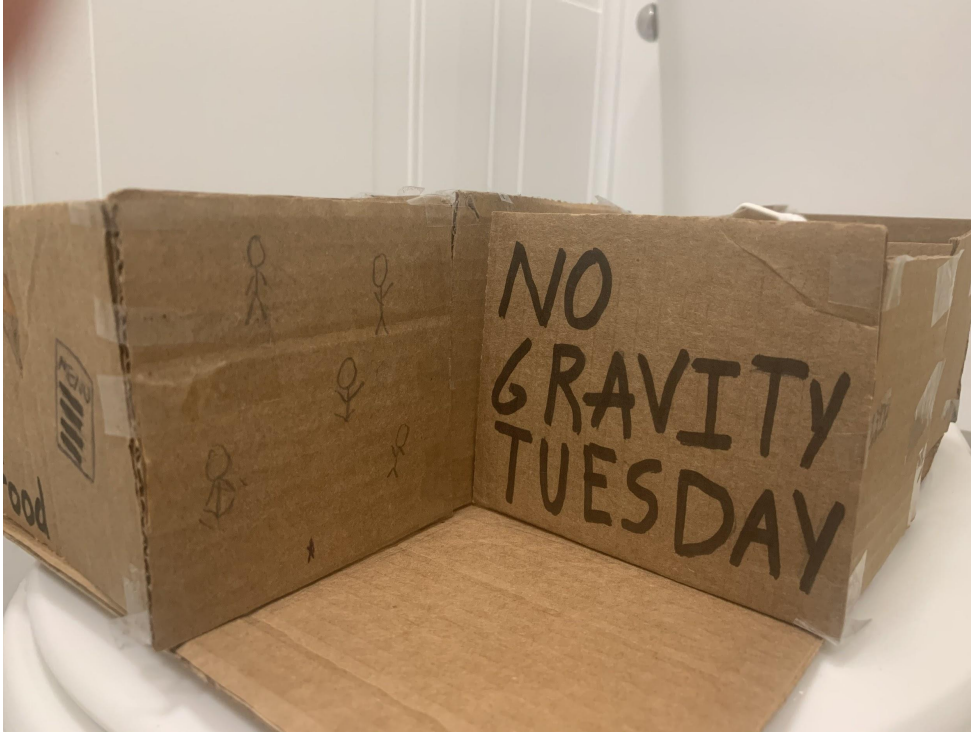

Future City Team Name: **Moony**

Deliverable Details

- This slideshow is your chance to present your model. Whether your team created a single model or multiple segments, here is where you show off the future city you designed to the judges.
- Choose photos of the various segment(s) that best show the requested content.
- Do not change the size of text boxes in this template. All written text must fit within the boxes and *cannot* be smaller than size 14 in Calibri (or equivalent) font.
- When finished, save the slideshow as a PDF and upload to the Online Portal at FutureCity.org.

Section I
CITY DESIGN

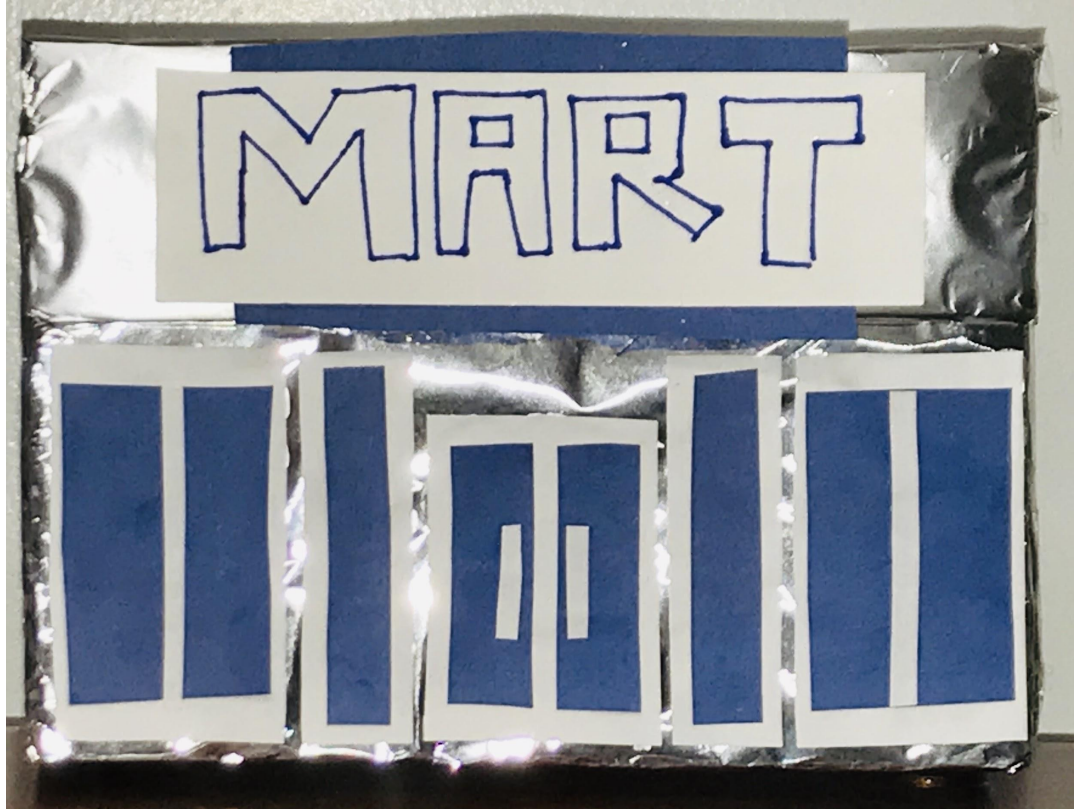

Residential Zone

What is important for the judges to know about your residential zone?:

Our residential zone also has the location for “No Gravity Tuesday” so our residents don’t have to go far to have fun.

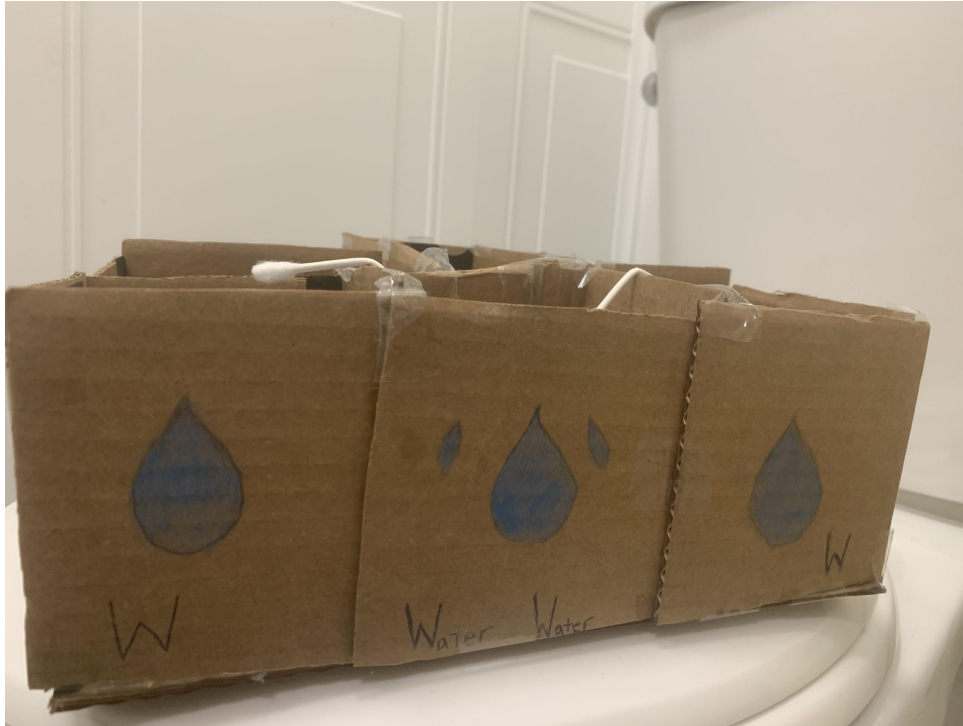

Commercial Zone

What is important for the judges to know about your commercial zone?:

Our commercial zone is combined with our residential zone for convenience.

Infrastructure Example 1

What type(s) of infrastructure are shown here (water, power, utilities, etc.)?:

How are these related to the realities/challenges of living on the Moon?:

This is our water facility where we take the frozen water from the Moon and melt it and purify it.

Infrastructure Example 2

What type(s) of infrastructure are shown here (water, power, utilities, etc.)?:

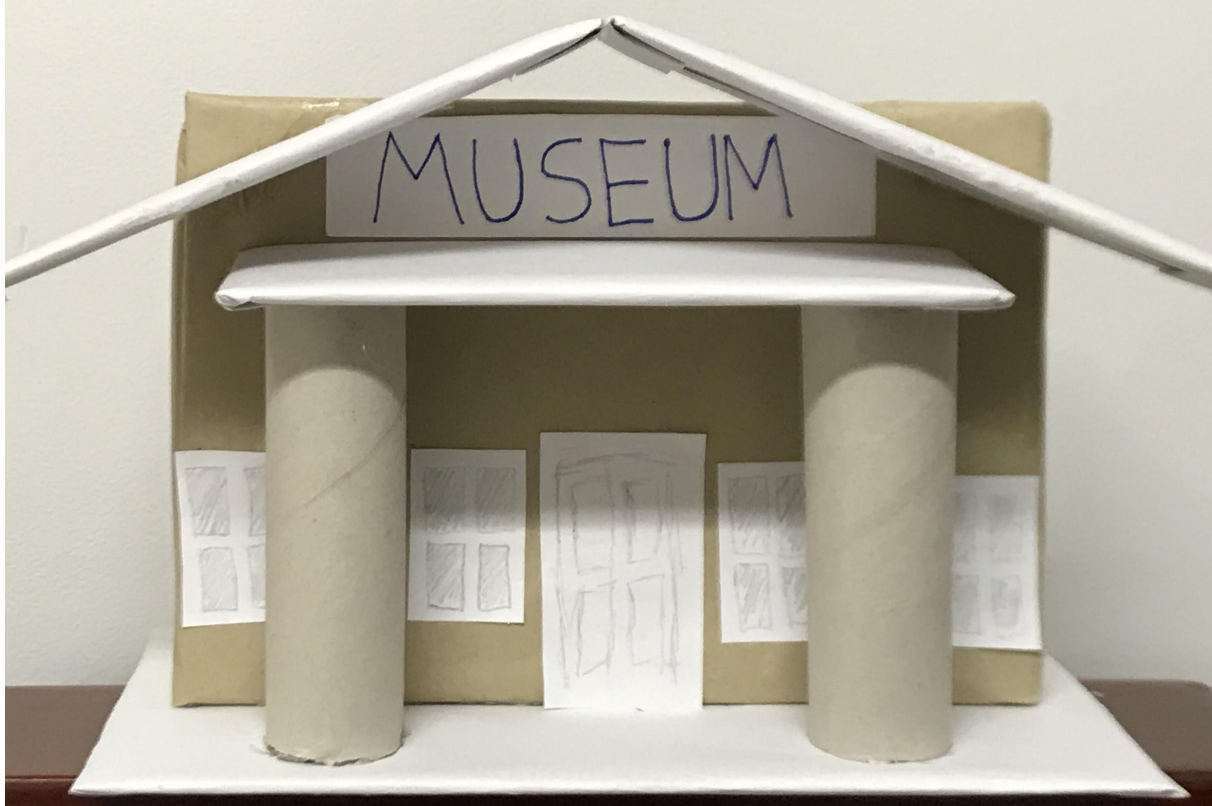

How are these related to the realities/challenges of living on the Moon?:

This is our electric plan where solar power is turned into electricity for our city.

Section II

BUILD IT: QUALITY, SCALE, AND MATERIALS

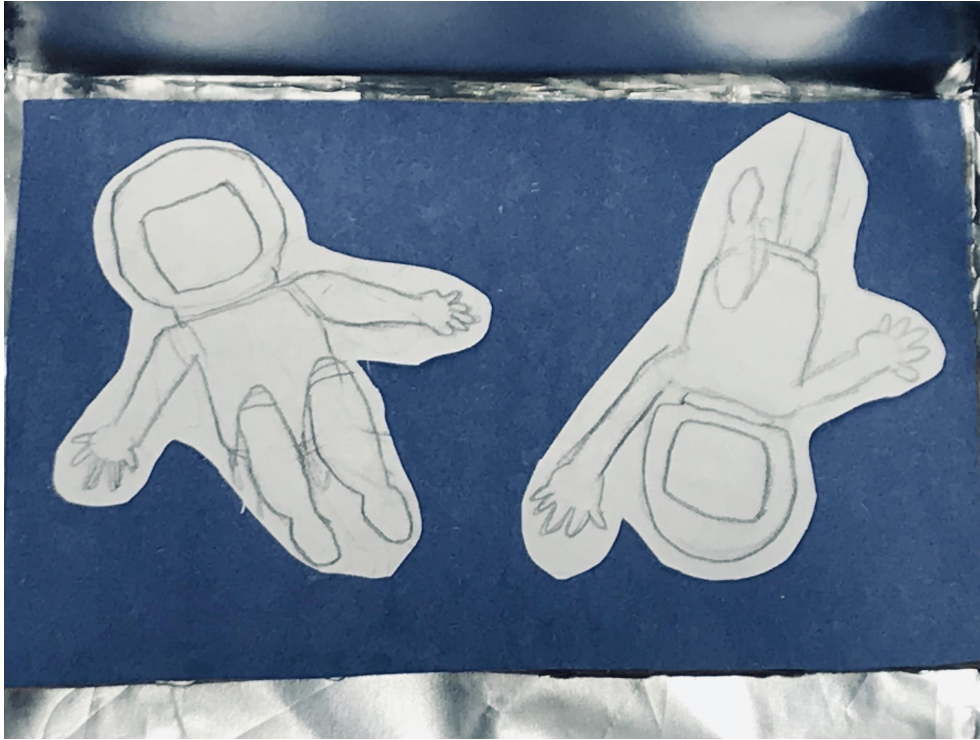

Innovative Material & Use Example 1

Choose one recycled or reused item and describe how you used it creatively in your model:

This is our museum which is made out of cardboard, paper, and toilet paper rolls. People can come here and see cultural items.

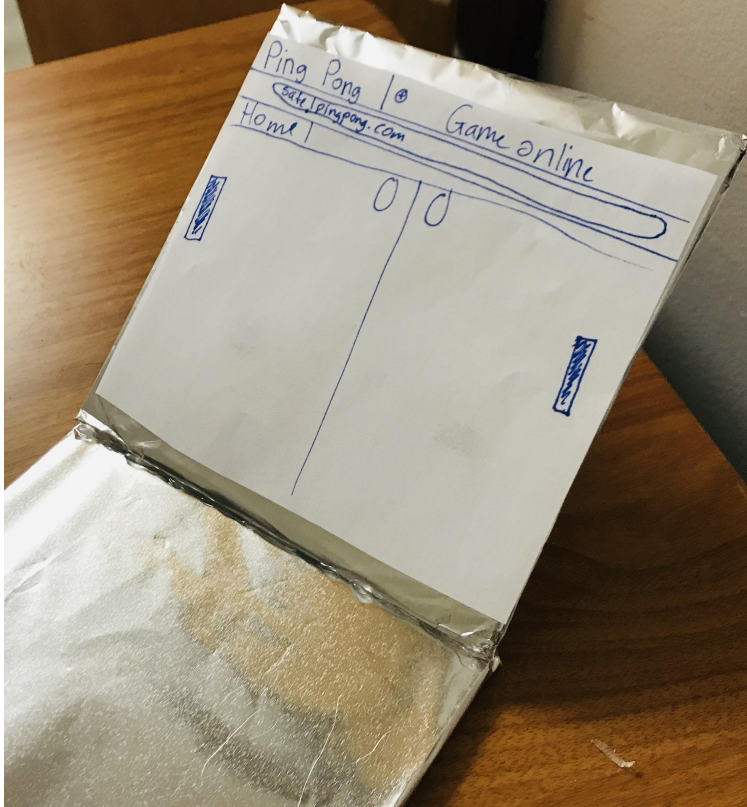

Innovative Material & Use Example 2

Choose another recycled or reused item and describe how you used it creatively in your model:

This is an example of 2 people playing during no gravity Tuesday. It's made out of paper, construction paper, foil, and cardboard.

Innovative Material & Use Example 3

Choose another recycled or reused item and describe how you used it creatively in your model:

This is a laptop where people can play virtual games and stay safe in their houses. It's made out of cardboard, foil, and paper.

Section III

JUDGE ASSESSMENT OF MODEL
